Student How to Guide

How to do the half term 4 Maths assessment on Google Classroom

The assessment will be completed online on Google Classroom.

You will need your exercise book, a pen, a pencil and a ruler. For those doing the Stage 5 assessment (9a1, 9c1, and 9d1) it is a Calculator Test. For everyone else it is a Non-Calculator Test.

When you are ready to take the assessment, go to your Maths class on Google Classroom. Click on Classwork and find the assessment under the Revision & Assessment section.

Year 7 will do the assessment during Week 7 (week beginning 4th May).

Years 8 and 9 will do the assessment during Week 8 (week beginning 11th May).

You may do the test at any point during the week.

The questions in the assessment will look the same as the half term tests you have done in school. The only difference is the questions are now multiple choice. Like usual, it should take about an hour, but it may take slightly longer as you will need to work on paper and then choose your answer on the computer. You need to do the assessment in one go so make sure you have enough time to finish the test when you begin. Your mark will be given back to you at the end of the week.

The best way to complete the assessment is to read each question carefully and attempt it in your exercise book. Once you have an answer in your book, look at the options available on the screen and choose the one that matches what your answer. If none of the answers on the screen match yours, then have another go at the question. Read it again carefully and check your workings thoroughly.

The marks you get from this test will not form part of any future set movements. It is purely so you and your teachers can see what areas need to be reviewed once we return to school. Please do not stress about it, just do your best. If you have kept up to date with Hegarty you should do fine.

Please email your teacher if you have any questions or problems accessing the assessment.

Good Luck
